

This exploded view diagram illustrates the assembly of a carburetor. The central component is the carburetor body (27), which is surrounded by various sub-assemblies and individual parts. At the top, the float bowl (3) is shown with its gasket (9) and mounting screws (4). The float valve assembly (8) is positioned above the bowl. The float (14) is shown as a separate component. The float needle (35) is shown in its retracted position. The float valve seat (13) is shown below the float bowl. The float valve spring (5) and float valve pin (6) are shown below the float valve seat. The float valve pin (20) and float valve pin (7) are shown below the float valve pin (6). The float valve pin (1) is shown below the float valve pin (7). The float valve pin (2) is shown below the float valve pin (1). The float valve pin (3) is shown below the float valve pin (2). The float valve pin (4) is shown below the float valve pin (3). The float valve pin (5) is shown below the float valve pin (4). The float valve pin (6) is shown below the float valve pin (5). The float valve pin (7) is shown below the float valve pin (6). The float valve pin (8) is shown below the float valve pin (7). The float valve pin (9) is shown below the float valve pin (8). The float valve pin (10) is shown below the float valve pin (9). The float valve pin (11) is shown below the float valve pin (10). The float valve pin (12) is shown below the float valve pin (11). The float valve pin (13) is shown below the float valve pin (12). The float valve pin (14) is shown below the float valve pin (13). The float valve pin (15) is shown below the float valve pin (14). The float valve pin (16) is shown below the float valve pin (15). The float valve pin (17) is shown below the float valve pin (16). The float valve pin (18) is shown below the float valve pin (17). The float valve pin (19) is shown below the float valve pin (18). The float valve pin (20) is shown below the float valve pin (19). The float valve pin (21) is shown below the float valve pin (20). The float valve pin (22) is shown below the float valve pin (21). The float valve pin (23) is shown below the float valve pin (22). The float valve pin (24) is shown below the float valve pin (23). The float valve pin (25) is shown below the float valve pin (24). The float valve pin (26) is shown below the float valve pin (25). The float valve pin (27) is shown below the float valve pin (26). The float valve pin (28) is shown below the float valve pin (27). The float valve pin (29) is shown below the float valve pin (28). The float valve pin (30) is shown below the float valve pin (29). The float valve pin (31) is shown below the float valve pin (30). The float valve pin (32) is shown below the float valve pin (31). The float valve pin (33) is shown below the float valve pin (32). The float valve pin (34) is shown below the float valve pin (33). The float valve pin (35) is shown below the float valve pin (34). The float valve pin (36) is shown below the float valve pin (35).
